Fenesta floor-to-ceiling slider in walnut finish

Happiness inside. Worries outside.

No surprises why people prefer Fenesta

Be it the harsh elements of nature, the follies of irresponsible industrialisation, smoke spewing vehicles, the cacophony of chaos or the fear of not getting the right service - Fenesta keeps them out, forever. All that it allows to come in, is goodness and the assurance of having made the right choice.

Fenesta. India's No.1 Windows and Doors Brand

Fenesta, a 'Superbrand', is the leading brand in Windows & Doors in India. Fenesta pioneered the design, manufacture, installation and service of precision engineered, 100% customised windows and doors in the country. Today, numerous homes, colleges, hospitals and hotels across the nation are adorned with more than two and half million Fenesta Windows and Doors. With its unmatched technical superiority and wide range of offerings Fenesta has firmly established itself as India's No.1 Windows and Doors brand with a nationwide presence in more than 350+ cities.

Keeps Noise Out

Welded joints, double seals and multiple-point locks make them virtually airtight, reducing the menace of street noise. Traditional windows, on the other hand, have gaps in the frame as well as between the wall and the frame, inviting unwanted noise.

Keeps Rain Seepage Out

To keep out lashing horizontal rain, Fenesta has engineered three special mechanisms: the Rain Track, the Gradient Slope and the Sill Arrangement. Traditional windows have none of these. In fact, when wooden windows warp – as they often do – rain flows indoors through gaps. Aluminium windows too are not designed to prevent rain seepage.

Keeps the Effects of Stormy Weather Out

With utmost ease because their broader sections are fortified with thicker steel reinforcements and a special invention called the 'Hurricane Bar'. Conventional windows are much weaker. They develop narrow air gaps that allow winds to whistle through. They also start rattling.

Keeps the issues of warping and termites out

A wooden window expands in the monsoons and contracts in the heat. Over time, it loses not just its shape and colour but also its ability to perform. They warp, chip and are open to termite attacks, cracks appear through which noise, dust, pollution and rain enter your home. In a few years, you'll need to replace it. Fenesta, on the other hand, is immune to seasons and continues to perform year after year.

Keeps High Energy Costs Out

Poor sealing in conventional windows raises air-conditioning costs. The problem magnifies with low cost aluminium – a good conductor of heat. In sharp contrast, Fenesta is a poor conductor of heat. In addition, superior sealing, both in the window frame and between the wall and the window prevents cold air from escaping and hot air from coming in. Rooms cool faster and thermostat cuts off sooner.

Keeps Mosquitos Out, Ventilation in

Fenesta has a special bug mesh integrated into both its sliders and casements (windows that open inwards and outwards). In the Villa window, the bug mesh is standard.

Keeps Worries of Proper Installation Out

Proper installation is crucial to long-term window performance. That's why Fenesta has qualified installation teams who follow a precise 9-step process. Unlike others, Fenesta teams have handled more than 2.5 million installations. In individual homes, the teams can install windows in a day without any disturbance to family life.

Keeps the Fear of Break-ins Out

Yes, they can and they do. The Fenesta Villa window, for instance, has an integrated grill clamped to the window frame – unlike traditional grills that are fitted in the masonry. Most Fenesta models come with multiple point locks and the option of grills and toughened glass.

After Sales Service in. Tension Out

Should you need any assistance at any time, just call the toll-free number (1800 102 9880). Open 365 days a year, the Fenesta Customer Service Center responds in a flash.

End-to-End Solution

Stage I:

Consultation Visit: Our first step involves a consultation visit to assess your specific needs. Do you face challenges such as neighbourhood noise, dust, rain, heavy winds, or insufficient sunlight affecting your space? Fenesta is here to address your concerns and find tailored solutions for you.

Stage II:

Customised Designs: Fenesta's experts will recommend the most effective long-term solutions, ensuring that your windows are tailored to work best in your space for years to come.

Stage III:

Survey (final measurements & discussion): This step involves precise measurements of each aperture and final approvals on selections made by the customer.

Stage IV:

Manufacturing: Once your choices are confirmed, we proceed with the manufacturing of your customised windows/Doors.

Stage V:

Delivery & installation: The windows arrive at your site at the appointed date. Installation is carried out once the civil work is complete. The installation process involves the use of anchor fasteners and sealants between the wall and the frame.

Stage VI:

Cleaning & Handover: After the installation is complete, we thoroughly clean the installation premises. Our technicians will also provide a practical demonstration of each window to ensure your full understanding and satisfaction.

Stage VII:

After-sales Support: Our customer service cell works for 365 days. You can call us at 1800 102 9880 (Toll free), ☎ 74286 91568, or email at response@fenesta.com for any help that you require for smooth operations of your windows.

Product Range

The Villa Window

A rare combination of style and substance, the Villa Window when launched was the first to introduce a twin sash, bug mesh and a grill built in the system. This ensures enhanced security and ventilation while not allowing insects and mosquitoes inside.

Available in uPVC.

The Tilt and Turn Window

Welcome more sunlight and ventilation inside your home with these Tilt & Turn windows. Featuring a sash that can tilt open at an angle from the top with hinges at the bottom or can swing inwards with hinges on the side. Advanced engineering facilitates both these operations with the simple turn of a single handle.

Available in uPVC and Aluminium.

The Slider Window and Door

Featuring horizontal sashes fitted with rollers at the bottom, these windows optimize space with their swift sideways movement. Easy to open and shut, the slider gives you great ventilation and the widest view possible. Slider door is available in threshold and non-threshold options.

Available in uPVC and Aluminium.

The Casement Window

Featuring a sash that is hinged from the side on an outer frame that can open inwards or outwards. This ensures maximum ventilation in the room. Due to its double/triple glazing options, they enable better thermal and sound insulation as well. The windows come with multiple point locking systems and friction stay that ensures the window remains open in a fixed position even in the face of a stiff breeze.

Available in uPVC and Aluminium.

Product Range

The Slide & Fold Door

Nothing looks or works better in rooms overlooking gardens and terraces. Fenesta Slide and Fold Door can elegantly and effortlessly connect your inside space with the environment outside. Stylish, contemporary and elegant, they offer a unique slide and fold mechanism that can divide and join large openings effortlessly. Fusion-welded frame and a sash for strength ensure that their beauty stays ageless.

Available in uPVC and Aluminium.

The Lift & Slide Door

Enjoy vast panoramic views with divider-less glass panes that offer superior insulation and enhanced security. Lift & slide technology can connect inside with outside with just a feather touch. Available in thermal break and non-thermal break variants.

Available in uPVC and Aluminium.

Ultra Slim Slider Door

Enter a new dimension of elegance & sleekness with just 40 mm of interlock sightline which aligns the doors in perfect harmony with modern architectural designs.

Available in uPVC.

Large Slider Door

Explore a new possibility with extended length and breadth (2000 mm x 4200 mm) along with adding exquisiteness to the environment with large slider doors which offers minimally visible sightlines of 30 mm for maximized visibility along with scoring high on functionalities.

Available in Aluminium.

Product Range

Slim Line Slider Door

Fenesta's range of Slimline Sliding Doors offers minimally visible aluminium sight lines of 25mm, which maximises the view you get. With a great balance of functionality and style, these Aluminium doors add exquisiteness to the façades they are used in.

Available in Aluminium.

Aluminium One Side Fix One Side Railing Slider

Step into a world of sophistication and safety with our Aluminium sliding doors adorned with an integrated railing that not only elevates the aesthetics of your space but also offers unparalleled security with its sturdy build.

Available in Aluminium.

90° Corner Slider

Keeping in mind the styles of contemporary homes, Fenesta introduces the 90° Corner Slider system. It is perfect for use in corners of balcony, garden spaces and façades.

Available in uPVC and Aluminium

Glass-to-Glass Window

Features a fixed window unit, where the glass panes meet at an angle of 90° and are neatly joined together without using any mullions.

Available in uPVC and Aluminium.

Product Range

Casement Door

Counted among the most popular door designs, it gives a classic look in even the most modern of settings. Designed to swing inwards or outwards with the twist of a handle, Casement Doors offer clear views of the other side. Above all, it's their picturesque profile that makes Casement Doors the preferred choice for many. These Doors are equipped with hook locks and 3D hinges which ensure smooth operation with safety.

Available in uPVC and Aluminium.

Internal Door

Fenesta's Internal Doors are made of a special hybrid polymer. They are composite materials made of wood fibre and thermoplasts replacing traditional material, hence making them environment friendly. Hybrid polymer is very sturdy and makes the doors resistant to termite, water, moisture absorption, fire and wear & tear of weather. Unlike the old-style traditional doors, Fenesta Internal Doors are low maintenance, superior in quality and lasts longer.

Designer Door

The Fenesta Designer door can be used at entrance, rooms, bathrooms, kitchen or anywhere else. The core is filled with a metal sheet and foam to enhance sound & thermal insulation and weather-endurance.

Engineered Wooden Doors

Fenesta's range of Engineered Wooden Doors are factory made and completely customisable. These are perfect for both internal and external door applications. Taking inspiration from the traditional designs and combining it beautifully with the modern innovations, these Fenesta doors are truly a work of art.
